Coating systems for generators

Single-source coatings for generators

Keeping the lights on and the power running during a blackout, storm or other disaster is critical. Between outdoor exposure and, in some cases, periods of inactivity, you need generator coatings that protect both the exterior surfaces and the electrical equipment inside, ensuring functionality when on-the-spot power is needed.

PPG has a broad portfolio of coatings engineered to withstand extreme environments while providing the ultimate corrosion protection. Our extensive line of powder, liquid, electrocoat, and pretreatment products are engineered to optimize reliability, efficiency and longevity of your power generation products.

Unique benefits

- Specially formulated to provide exceptional edge coverage on louvers and sharp corners
- Complete portfolio of UL-certified coatings designed for corrosion, UV, and chemical resistance
- Broad color palette
- Technical and product support
- Multi-technology compatibility that works over a variety of substrates
